

A new Care Planning and Working Board for Care Deliveries

Gaining a comprehensive overview at exactly the right moment – this is what the new Planning and working Board can offer. It's a helpful supplement to your documentary system and might as well be useful as a separate working planner.

In day-to-day nursing and –ward situations hundreds of pieces of information have to be handled. ONE essential requirement to be successful is the allocation of staff to clients/patients in order to channel the flood of information.

Handling:

- all information is displayed by icons/symbols; the symbols are decoded using a legend
- getting quickly informed about the latest developments/steps in patients' conditions when and where needed
- total overview by centralizing all information of every patient on one board
- symbols/icons on magnetic plates
- the board can be divided into different sections according individual priorities

Sections on the board:

- room number, resp. bed-place/number, name of patient with allocated staff or key person
- level of necessary care, permanent problems with various activities of daily life
- nursing and care measures which have to be carried out for the patient throughout the shifts; the planning and the carried-out phase are clearly separated from each other
- extra section for special remarks
- calendar per week or per fortnight or for longer periods fitted in an endless-system

Advantages:

- A useful tool which supports care planning and the report system
- much more security for the patient and the staff,
- avoiding errors concerning “has the measurement been carried out or not”,
- the universal application in nearly all sections of social health care facilities.

If required specified icons/symbols can be offered to special fields, such as: Psychiatry, neonatal departments, care of elderly people in residential areas, care of disabled people, out-patient departments etc.

Summary:

- Being well informed at first glance!
- All information can easily be read and interpreted!
- Clearly understandable icons/symbols!
- Care Planning and the reporting system work hand in hand with the board!
- A guarantee for successful day-to-day work!
